TALK FUSION

FUSION *On the GO!*

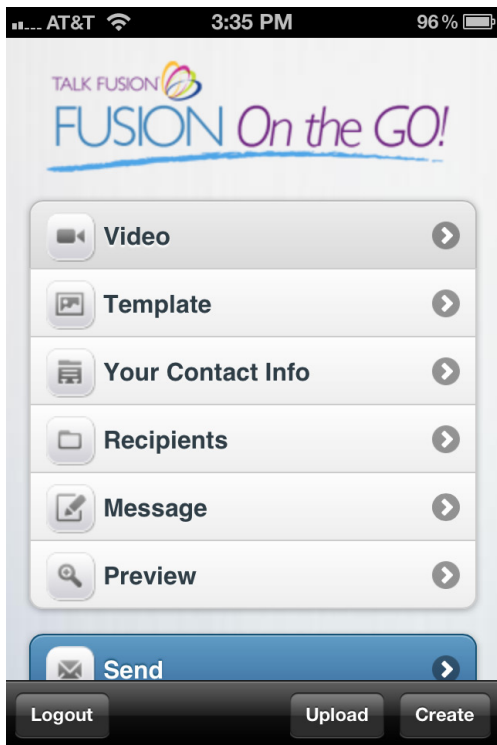

iPHONE APP TUTORIAL

**CREATE & SEND A TALK FUSION VIDEO EMAIL
ON YOUR IPHONE**

*Making and sending new Video Emails from anywhere in the world
is easy with Fusion On the Go! Here's how:*

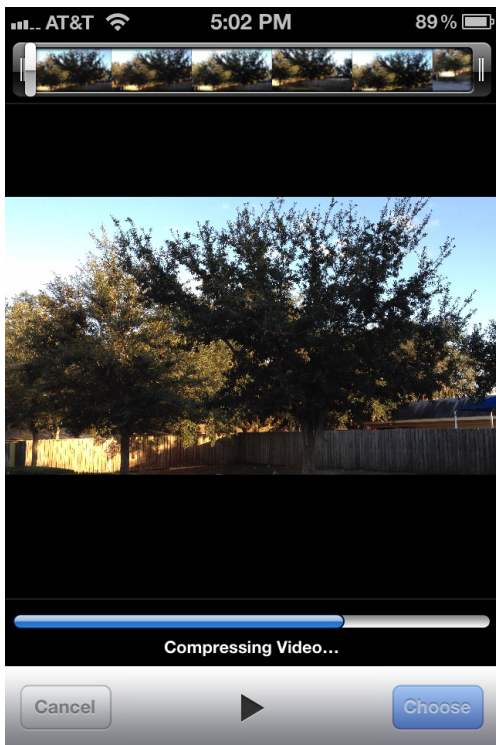

1. Log into Fusion On the Go using your Talk Fusion Member ID and Password.

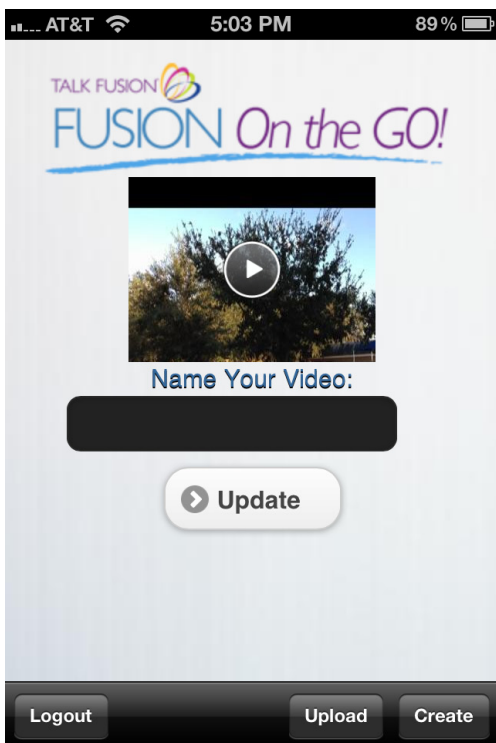

2. In your Talk Fusion On the Go Mobile Studio, you can either select a video by tapping the “Video” Bar or create a new video using your phone’s camera. In this tutorial, we will create a new video. Tap the “Create” Button in the lower right corner. This will activate your iPhone’s camera view.

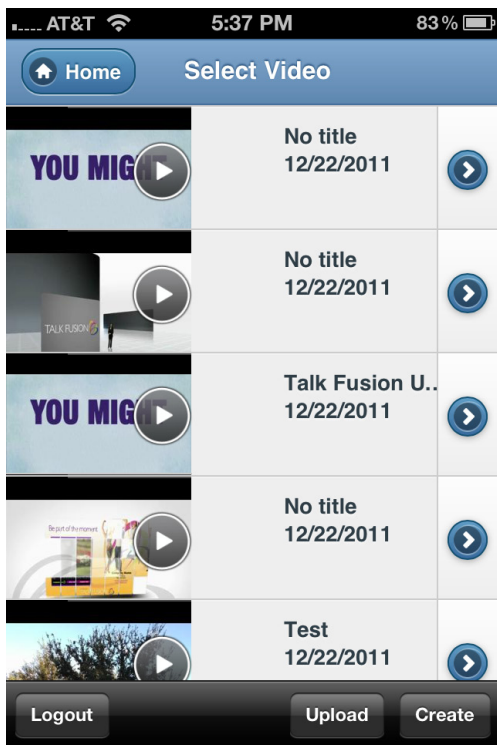

3. Select which camera view you want to record, front-facing or back-facing. Holding your iPhone horizontally, tap the Record button on the screen to begin and end your recording. (PLEASE NOTE: When recording yourself using the front-facing camera, rotate and hold your iPhone so the Home Button is on the left, as in the left image. When recording away from yourself using the back-facing camera, rotate and hold your iPhone so the Home Button is on the right, as in the right image.)

4. When you have finished making your video, tap the “Choose” Button. The video will be uploaded and processed.

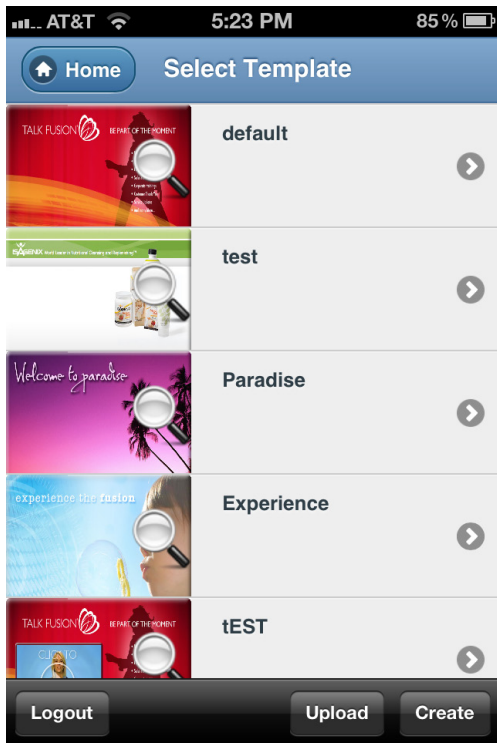

5. After uploading and processing, the Talk Fusion On the Go App will ask you to name your new video. Name your video, and tap the “Update” Button. You will be returned to the Mobile Studio. Tap the “Video” Bar.

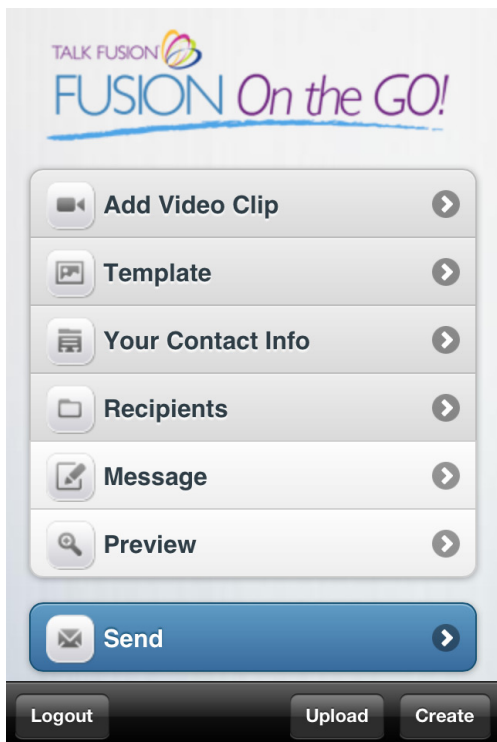

6. Here you can select the video you just made, or one of the videos already stored in your Talk Fusion Video Communication Center. Tapping an arrow over a video allows you to preview the video. Tap the arrow to the right of your new video to select it. You will be taken to the Template Preview Screen.

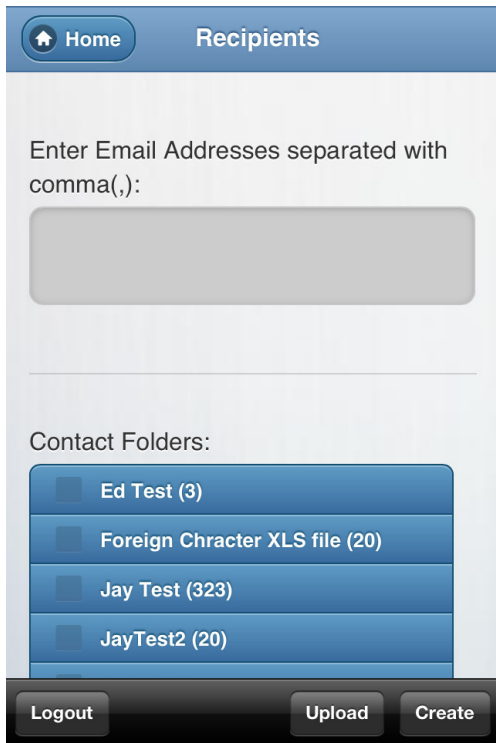

7. Here you see your video in the current template. You can keep the current template, go back and select another video, or change the template. Tap "Change Template."

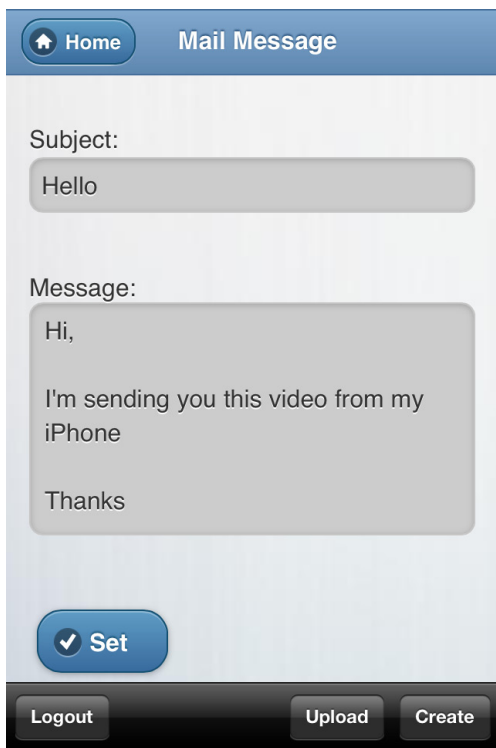

8. Scroll to see your available Templates, and choose one by tapping on the arrow to the right. (PLEASE NOTE: Only Templates you have Saved in your Video Email Studio will appear in your Mobile Studio—add more of your favorites by Saving them the next time you're on your computer!)

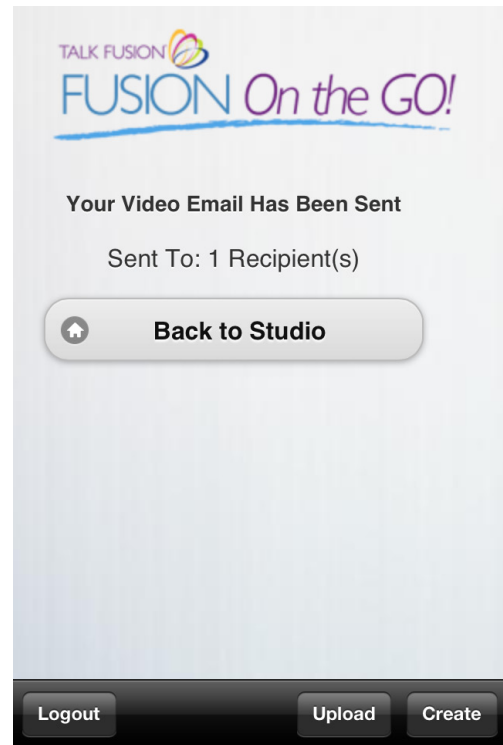

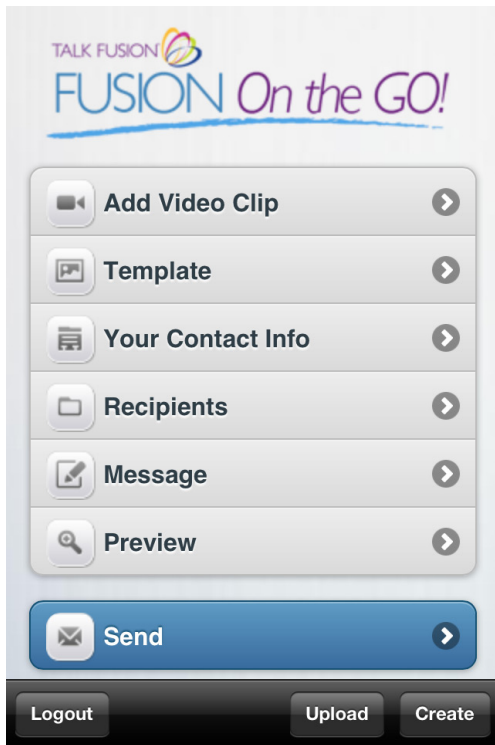

9. You will be returned to the Template Preview Screen. Tap the "Continue" Button to return to the Mobile Studio. Tap the "Your Contact Info" Bar to change your contact information that appears on the Template, or if you do not need to change your contact information, tap the "Recipients" Bar.

10. You can enter single email addresses separated by commas, or select one of your Contacts Folders. When you have selected your Recipients, tap the “Set” button at the bottom of the screen. You will return to the Mobile Studio. Tap the “Message” Bar.

11. Enter your subject and email body text. When you're done, tap the “Set” button at the bottom of the screen. You will return to the Mobile Studio.

12. Tapping the “Preview” Bar will return you to the Template Preview Screen for another look at your Video and Template. If you are satisfied with your Video, Template and Information, tap “Send.”

iPHONE APP TUTORIAL

Congratulations! You have created and sent a
Talk Fusion Video Email using the
Fusion On the Go App for iPhone. Be sure
and Share the Moment everywhere you go!
